

Helpful Project Management Tools for the Modern Manager

Technology Management Council

Carl Angotti, Angotti Product Development
Larry Reeves, TMC secretary

April 3, 2008 SCV/SF Chapter Meeting

Three Project Management Templates

- Status report template
- Action items spreadsheet template
- RSS buffer calculation template

General Project Management

- What you say you will do?
- When you say you will accomplish this?
- Did you do what you said, when you said you would?

The What and When

- Front End Planning
- Task List with dates
- Gantt Chart
- Excel Spreadsheet with dates

What's Happening?

- Status Reports – Non-Real Time Information from and to others
- Status Meetings – Real Time Information from and to others

Status Report Template

- Were developed from start of my career
- What should they contain?

Action Items Template

- Used for Status Meetings
- Were developed over time with use and observation

Action Items Template

- Focus of Status Meeting Agenda
- Completed quickly at end of meeting
- Show Priorities, What, Who and When

Project Buffer Template

- Scheduling and Schedule Slips
- Why Project Buffers
- How they work?

Managing Quality Issues

- **Failure Analysis**

 - Basic data collection

Document

- **Root cause & corrective action**

 - 8 Discipline approach

Document

- **Useful resource site**

 - DOE, FMEA, Lean/Six Sigma, SPC

 - Free resources & sell training

Document

www.qualitytrainingportal.com

Resources for Managing Projects

- **ProjectConnections.com**
 - **Extensive collection of project management**
 - Templates
 - White papers
 - Case studies
 - Articles & newsletter
 - **Subscription site**
 - **Basic membership is free**
 - Bi-weekly newsletter
 - ~20% of templates
 - **Premium membership \$15/mo**
 - 15 day free trial

[Agile Technique: Information Radiator](#)

Give your teams a taste of agile with something really visible: a status report that no one can miss. They're already on their way over to interrupt someone and ask, "Where are we?" so might as well hang the answers on the wall. These prominent displays communicate quickly, effectively, and easily, no matter how often the information changes, as long as you keep in mind the guidelines in this technique brief. You just need a few office supplies and the willingness to let everyone to know what's really going on.

[Download the guideline](#) »

[Project Team Organization and Assignments](#)

Funny how it always seems like it's Somebody Else's Problem, isn't it? Make sure everyone else on your cross-functional project team understands their role as well as everyone else's. This checklist will help you organize and document the relevant information -- including roles, responsibilities, and contact information -- so everyone knows who is doing what and how to find them. You may even find that people are a little less breezy about what they sign up to deliver when it's down on paper for the world to see.

 - Why its useful
 - How-to use it

INTRODUCTION: Issue Resolution Status Report
<i>The guideline and template content starts on the following page.</i>
What This Is Format for reporting progress on work to resolve one or more open issues (e.g. project or technical issues). Contains a bulleted format (that will fit on a PowerPoint slide) for reporting progress on an individual issue. Also contains a table format for showing consolidated issues list with indication of root causes once they're resolved.
Why It's Useful If it's really an issue, someone, somewhere, cares about whether the issue is being addressed. It's often not enough to just be informed when the issue is resolved and closed, especially if the issue takes a while to get resolved. Silence unfortunately can be taken as a lack of effort or progress on an issue. Interim communication can be very important for keeping people informed, calm, supportive, and confident that you're taking care of the problem. In situations where the issue occurred at a customer site, this information helps sales, marketing, customer support people keep the customers informed as they're waiting on the resolution. And as issues are resolved and their root causes analyzed, seeing a running tally of those issues and their root causes helps the team see where there could be room for improvement in testing, design reviews, etc.
How to Use It <ol style="list-style-type: none">1. Start the table format as your summary report. If you use issue-tracking software, this kind of table can likely be created by programming a field (or using an existing one) for 'root cause' and entering the cause for each issue.2. Decide who needs to get interim status of issues, and how often. Think of the 'customers' for the fix—customer support personnel, marketing people who have to answer questions from customers, account teams interfacing directly with customers, etc.3. Decide how to record and distribute the status and create a regular mechanism. Decide whether to generate a written status to be distributed to people in email, or whether the information will reside online somewhere and/or presented in weekly team meetings.4. Create your first status "report" for a set of key issues that you need to report status on, using the categories and bullets shown on the next page. (In our format, the information is captured in bullets to make them easily readable and digestible.)5. Create a summary list of issues, status, and root causes using the format on the last page.

ProjectConnections.com

Issue Status: [issue #, title]

- **[Product name]**

- **Problem**

- [Describe problem here: Symptoms, customer or situation in which it occurred, etc.]

- **Strategy**

- [explain what the team is doing to diagnose the problem and determine a solution]

- **Schedule**

- Task 1 (e.g., design a fix) 08/12/04
 - Task 2 (e.g., prototype the fix) 09/16/04
 - Task 3 (e.g., unit test and integrate the prototype) 10/12/04
 - Task 4 (e.g., review results of testing) 10/22/04
 - Task 5 (e.g., approve final fix) 11/15/04
 - Task 6 (e.g., make available to Customer X – critical need) 11/20/04
 - Task 7 (e.g., test at 5 customers) 11/29/04
 - Task 8 (e.g., review and release final change) 01/15/05

- **Owner**

- **Issue Resolution**

- **Reporting on progress and status**
 - **“One pager” per issue**
 - **PowerPoint slide**
 - **Text report**
 - **Summary status for all issues**

Paired Comparison Template

Figure 2: Example Paired Comparison Analysis Table (filled in):

	Overseas Market (A)	Home Market (B)	Customer Service (C)	Quality (D)
Overseas Market (A)		A,2	C,1	A,1
Home Market (B)			C,1	B,1
Customer Service (C)				C,2
Quality (D)				

Finally she adds up the A, B, C and D values, and converts each into a percentage of the total. This gives these totals:

- A = 3 (37.5%)
- B = 1 (12.5%)
- C = 4 (50%)
- D = 0.

- Use to rank alternatives
- Example:
 - Which to invest in:
 - Overseas markets
 - Home market
 - Customer Service
 - Quality
 - Assign ID to each option
 - Compare Pairs
 - Numerical importance
 - 0 = no difference
 - 3 = major difference
 - Sum score for each

Running on New Rails (Part 2)

Lights, Camera, Telephone!
-by Mike Donoghue
Despite this author's concerns, there are some evolutionary jumps in technology that are attempting to circumvent his diminutive authority and make video communication a reality. Reach for that hairbrush, people!

Power to the People
-by Mike Donoghue
Are you a power leech? There are a number of options out there—and plenty of upcoming ones on the tech landscape—to feed your need.

Hit Hot Buttons in Justification
-by Joe Wynne
Nothing makes executives salivate like when you hit their hot buttons with your justification. Executives' top three drivers of competitive advantage should be your guide.
